

Contents

1	Introduction	1
1.1	Phospholipids: structure and phase behavior	1
1.2	The ripple ($P_{\beta'}$) phase	12
2	Data Analysis	26
2.1	Introduction	26
2.2	Experimental procedure	29
2.3	Data reduction	33
2.4	Modeling of the ripples	38
2.5	The fitting procedure	44
2.6	Conclusion	45
3	Structure of the Asymmetric Ripple Phase	47
3.1	Introduction	47
3.2	Motivation	47
3.3	Electron density map of DMPC	53
3.4	Electron density maps of POPC, DHPC and DLPC	62
3.5	Influence of chirality	68
3.6	Conclusion	69
4	Structure of the Metastable Symmetric Ripple Phase	75
4.1	Introduction	75
4.2	Freeze fracture electron microscopy of metastable ripples	76
4.3	X-ray studies of metastable ripples	78

4.4	Electron density map of metastable ripples in DPPC	80
4.5	Conclusion	92
5	A Landau Theory of the Ripple Phase: Asymmetric ripples in Achiral Membranes	95
5.1	Introduction	95
5.2	The Chen-Lubensky-MacKintosh theory	103
5.3	Previous theories that predict asymmetric modulations in achiral systems	107
5.4	A Landau theory for achiral bilayers	110
5.5	Conclusion	119
